## Activity Corner

*Activity Corner* offers thousands of fun, hands-on activities for students of all ages. The activities are perfect for cooperative small group or individual projects in the classroom or school library. Teachers can quickly navigate the searchable database to find terrific projects for their classroom based on such categories as topics, cost of materials, age range, or time required.

# Activity Corner

*Activity Corner* offers an easy and versatile way to find exciting and educational creative projects to suit classroom instruction or school library programming.

**Powerful search and browse option** allows you to search by keyword or browse activities using such categories as age range, type of activity, culture, time to complete, cost of materials, or holiday themes.

Learn the basic steps and materials of many activities through the **How To** section. Illustrations and photographs make it easy to understand how to create a polished, finished product.

All **activity pages** list materials in a sidebar so it is easy to see at a glance what is needed for a project. Print, email, or save the activity to your personal computer through the Tools box at the top of the page.

## Key Features

- **Complete instructions with illustrative images** and a list of easy-to-find materials give teachers and students the information they need to create inventive crafts and art projects.
- Effortlessly **customize** arts and crafts time with activities that range from simple projects geared to younger children, such as making fresh lemonade, to more complex creative projects for older students, such as putting together a scrapbook.
- **Share projects** with the World Book *Activity Corner* online community and make crafting social! The **My Projects** feature allows patrons to share their own projects with others. Users may enter the steps and images for the activities they've made in four simple stages.
- **Curriculum correlations** for alignment to Common Core, state, and provincial standards make it easy for teachers to ensure that the activities they select fulfill their instructional goals.
